Bulk Water Sales Policy

Water sold to contractors or individuals by bulk will be taken from the water plant and not Hydrants. The raw water is provided by a well at the water plant and is equipped with a 2" meter service, which extends to the exterior of its fence line on Devillier Street. Anyone taking water repeatedly for any period of time will be issued a key to the lock on the meter and a log sheet. The date and meter readings (Beginning & Ending) will be logged each time water is taken and the customer will be billed accordingly at a rate of \$3.00 per 1,000 gallons.

Should the well not be running at the time water is needed: This well runs approximately 14 hours per day, therefore, during the normal working hours of 7:30 am to 3:30 pm Monday thru Friday, excluding holidays, an employee will assist with starting the well should it not be running. Outside of the normal working hours, should an employee be called to the plant to start the well a \$50.00 service charge will apply.

"No one will be allowed inside of the plant grounds unescorted by a HNWS employee". Every precaution will be taken to protect the water supply. Users will operate valve at own risk. The water system will not be held liable for any damages; the customer will assume all responsibility for their actions.

Any policy or parts thereof in conflict with this policy are hereby repealed.

**APPROVED BY THE BOARD OF DIRECTORS DURING THE
MONTHLY MEETING HELD ON February 16, 2009.**
