Line Extension Policy

Section 1:

All potential main line extensions require a majority vote by the Board of Directors. The decision to extend a water main will be made based on (1) The ability to attain easement. (2) The availability of sufficient water pressure and its effects on the rest of the distribution system. (3) The cost feasibility of maintaining the extension.

Section 2:

It is important that anyone paying for a line extension solicit any potential customer of the extension, in an effort to share the cost.

Section 3:

Full payment of all material is required from the customer(s) prior to extending a water main.

Section 4:

Any and All water mains extended become the property and responsibility of the Henderson-Nina Water System, Inc.

Section 5:

There are no provisions in this policy, which allows that when additional customers are added to the line extension, (no matter how soon or how long after the line is in place) that said customer (s) will be charged additional cost, (proportion cost of the line extension) Said customer (s) will pay only the regular cost of a new service.

Repealer: Any policy or parts thereof in conflict are hereby repealed.

Policy approved by the Henderson-Nina Water System Board of Directors
Date: August 11, 2003
